

BIDHAN PANT

Bournemouth, United Kingdom | bidpant@gmail.com | +44 07771517853 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analytics Manager with 3+ years delivering insights across healthcare, public sector, and BI. Proficient in Python, SQL, Power BI, Tableau, GCP, and Databricks. Adept at building pipelines, managing complex datasets, and translating data into decisions across any data role.

CORE SKILLS

Programming & Data: Python (Pandas, NumPy, PySpark), R, SQL (PostgreSQL, MySQL, BigQuery), dbt, Databricks

Analytics & Statistics: Regression, Hypothesis Testing, Exploratory Data Analysis (EDA), Clustering, Data Quality & Missing Data Analysis

BI & Visualisation: Power BI (DAX, Data Modelling), Tableau, Looker Studio, Advanced Excel

Cloud & Platforms: Google Cloud Platform (BigQuery, GCS), Databricks, Jupyter Notebooks, Git

Professional Skills: Stakeholder Engagement, Data Governance, GDPR Compliance, Documentation, Agile Collaboration

PROFESSIONAL EXPERIENCE

Data Analytics Manager

May 2025 – Present

The UK Kidney Association (UKKA) | Bournemouth, United Kingdom

Core Role – Renal Data Registry (RaDaR)

- Manage the UK Renal Data Registry (RaDaR), overseeing GDPR-compliant data collection across kidney centres nationwide and leading quality audits to ensure data completeness and accuracy.
- Design and execute complex SQL and PySpark queries to extract, validate, transform, and enrich large-scale clinical datasets.
- Build structured validation routines and audit frameworks to ensure data completeness; produce recruitment, missing data, and progress reports for senior leadership and external stakeholders.
- Resolve database and data-entry issues via a dedicated helpdesk, consistently meeting SLAs across multiple NHS sites, and present technical findings to clinical and non-technical audiences.
- Maintain data dictionaries, workflow documentation, and audit trails to support continuity, onboarding, and full governance compliance.

LifeArc Kidney Ecosystem Initiative – Lead

- Lead data collection and patient recruitment across 13 paediatric kidney centres, scoping eligible patient populations and supporting automated test-result integration.
- Collaborate directly with clinicians and researchers to define new data items, reporting requirements, and data quality benchmarks.
- Implement SQL- and Excel-based validation checks and maintain the RaDaR Paediatric Data Dictionary.
- Produce and disseminate monthly recruitment and data completeness reports to senior leadership and external stakeholders.

BI Data Analyst (Virtual Internship)

Oct 2024 – Mar 2025

PwC Switzerland

- Analysed HR, workforce, and customer engagement datasets to surface performance trends, diversity insights, and operational KPIs.
- Designed and built interactive Power BI dashboards to communicate executive-level insights to senior leadership.
- Conducted root-cause analysis on gender imbalance at leadership levels using statistical and data-driven techniques.
- Delivered concise, structured insight reports consistent with professional consulting and stakeholder communication standards.

Data Administrator (Temporary)

Jun 2024 – Oct 2024

Bournemouth & Poole College | Bournemouth, United Kingdom

- Ensured high data integrity and ESFA compliance across Management Information and funding datasets for a large further education institution.
- Analysed large student datasets to support funding accuracy, operational reporting, and regulatory submissions.
- Developed performance dashboards tracking student enrolment, retention, and outcomes to support senior management decisions.
- Supported database validation routines and provided technical support to academic and administrative staff.

ADDITIONAL EXPERIENCE

Data Analytics Mentor

Nov 2025 – Present

Topmate

- Provide 1:1 mentoring on SQL, Python, Power BI, AI projects, and UK data career strategy to aspiring data professionals.

Freelance Data Analyst

Oct 2025 – Present

Upwork

- Deliver end-to-end analytics solutions for clients using Python, SQL, Power BI, and Google Cloud Platform across diverse industries.

KEY PROJECTS

- Hospital Episode Statistics (HES) – Kidney Research: Analysed national HES datasets to map kidney disease pathways, treatment patterns, and patient outcomes.
- ARPKD Research Project: Conducted statistical analysis on rare kidney disease cohorts, focusing on data completeness, quality, and research readiness.
- Kidney Biopsy & Genetics Research: Supported paediatric and adult clinical research using biopsy and genetic datasets in collaboration with clinical teams.
- UK Kidney Association – Data Integration & Reporting: Architected SQL and Python ETL pipelines and developed Power BI dashboards for national-level reporting.
- LifeArc CKD Paediatric Research (Ongoing): Developing advanced analytics pipelines and dashboards to support ongoing paediatric CKD research and patient recruitment.

EDUCATION

MSc Data Science & Artificial Intelligence

Distinction

Bournemouth University

BSc Computer Networking & IT Security

Distinction

London Metropolitan University

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Databricks Fundamentals
- dbt Fundamentals
- Advanced SQL – HackerRank
