PROFESSIONAL SUMMARY

Data Analytics professional with hands-on experience delivering end-to-end analytics solutions, from **data pipelines and modelling** to **BI dashboards** and stakeholder reporting. Proficient in **Python, SQL, Power BI**, and cloud tools including **GCP** and **Databricks**. Proven ability to translate complex datasets into clear, actionable insights that drive decisions at senior level. Background spanning analytics management, business intelligence, cybersecurity, and entrepreneurship.

CORE SKILLS

Programming & Data: Python (Pandas, NumPy, PySpark), R, SQL (PostgreSQL, MySQL, BigQuery), dbt, Databricks
Analytics & Statistics: Regression, Hypothesis Testing, Exploratory Data Analysis, Clustering, Data Quality & Validation
BI & Visualisation: Power BI (DAX, Data Modelling), Tableau, Looker Studio, Advanced Excel & Power Query
Cloud & Platforms: Google Cloud Platform (BigQuery, GCS), Databricks, Jupyter Notebooks, Git
Professional: Stakeholder Engagement, Data Governance, GDPR Compliance, Agile Collaboration, Technical Documentation

PROFESSIONAL EXPERIENCE

Data Analytics Manager · *The UK Kidney Association (UKKA), Bristol, UK* May 2025 – Present

Core Analytics & Data Engineering

- Manage large-scale **data registry operations**, overseeing **GDPR-compliant** data collection, governance, and quality audits across multiple NHS institutional sites nationwide.
- Design and execute complex **SQL** and **PySpark** pipelines to extract, validate, transform, and enrich large clinical datasets for research and operational reporting.
- Develop and maintain the **RaDaR dashboard**, a nationwide reporting platform enabling researchers, clinicians, and data teams to monitor **patient-level data completeness** and **cohort-based analytics** across all UK kidney disease registry sites.
- Build structured **validation frameworks** and maintain **data dictionaries**, audit trails, and workflow documentation to support governance compliance and senior stakeholder reporting.

LifeArc Paediatric Data Lead

- Led data collection and recruitment across **13 paediatric institutional sites**, supporting automated data integration workflows and meeting defined quality benchmarks.
- Developed automated **PDF extraction pipelines** for genetic and biopsy reports, enabling the statistics team to incorporate structured clinical data into downstream analytical workflows.
- Produced monthly **recruitment and completeness reports** for senior leadership and external partners; collaborated directly with clinicians and researchers to define data requirements and reporting standards.

Data Administrator · *Bournemouth & Poole College, Bournemouth* Oct 2024 – Mar 2025

- Ensured high **data integrity** and **regulatory compliance** across management information and funding datasets for a large further education institution.
- Analysed large **student datasets** to support **funding accuracy**, operational reporting, and regulatory submissions to governing bodies.
- Developed **performance dashboards** tracking enrolment, retention, and outcomes; provided database validation guidance and technical support to academic and administrative staff.

- Analysed **HR, workforce, and engagement datasets** to surface performance trends, diversity insights, and operational KPIs for senior leadership.
- Designed and built interactive **Power BI dashboards** to communicate executive-level insights; conducted **root-cause analysis** on workforce imbalance using statistical techniques.
- Delivered structured insight reports aligned with professional **consulting and stakeholder communication** standards.

- Co-founded a **cybersecurity firm** offering **penetration testing**, security audits, and web application assessments to clients across multiple industries.
- Built and operated a proprietary **bug bounty platform** enabling independent researchers to identify and disclose vulnerabilities, modelled on **HackerOne and Bugcrowd**.
- Developed internal **dashboards** to track submissions, researcher performance, and client SLAs; managed end-to-end client relationships and business operations.

KEY PROJECTS

1. Data Warehouse & Analytics: Built a modern data warehouse using **SQL Server** with **Medallion Architecture** (Bronze/Silver/Gold), including ETL processes, dimensional modelling, and an analytics reporting layer.

3. QueryNoir: SQL Learning Platform: Built an interactive detective game teaching **SQL** through investigative data scenarios, combining data storytelling with full-stack product thinking.

2. JobPulse: UK Job Market Analytics Pipeline: Built a job market analytics platform using **Python, PostgreSQL, FastAPI** and **Streamlit** to ingest UK job listings via APIs, transform data, and visualise hiring trends and skill demand.

4. Bug Bounty Platform (CaimTech): Designed and operated a **vulnerability disclosure platform** handling researcher submissions, client reporting, and SLA tracking, built from scratch.

EDUCATION

MSc Data Science & Artificial Intelligence

Distinction

Bournemouth University · 2024

BSc Computer Networking & IT Security

Distinction

London Metropolitan University · 2020

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Databricks Fundamentals
- dbt Fundamentals
- Advanced SQL – HackerRank
